

Step 1:

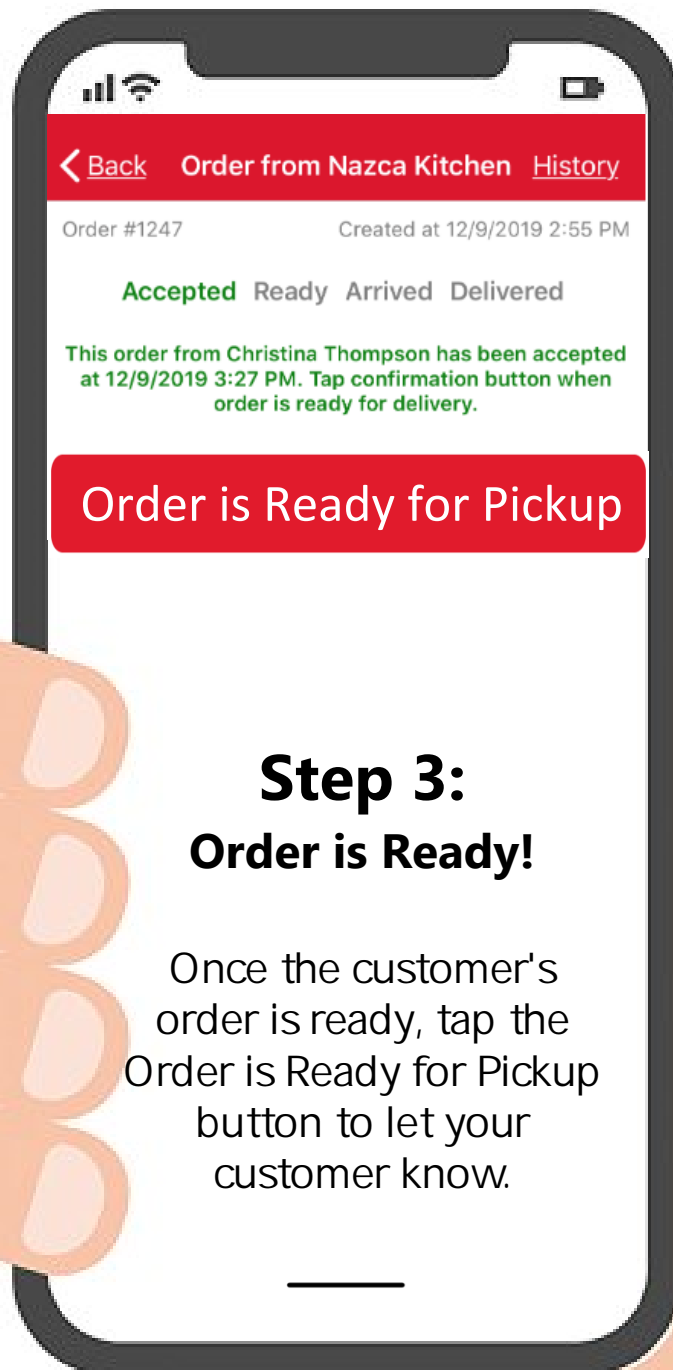

Receive a New Order

When a customer places a new order, you will receive a notification and alert.

Step 2: Confirm Order

Once you have reviewed your customers order, tap the Confirm Order button to let your customer know their order has been accepted.

Step 3: Order is Ready!

Once the customer's order is ready, tap the Order is Ready for Pickup button to let your customer know.

Step 4: Deliver to Your Customer

When you have been notified that the customer has arrived, notice the customer's vehicle description and license plate number and deliver the customer's order directly to their vehicle.
